

# LAPTOP DOCK & MONITOR(S)

## SETUP GUIDE

Follow the steps below to set up your laptop dock and/or monitor(s).

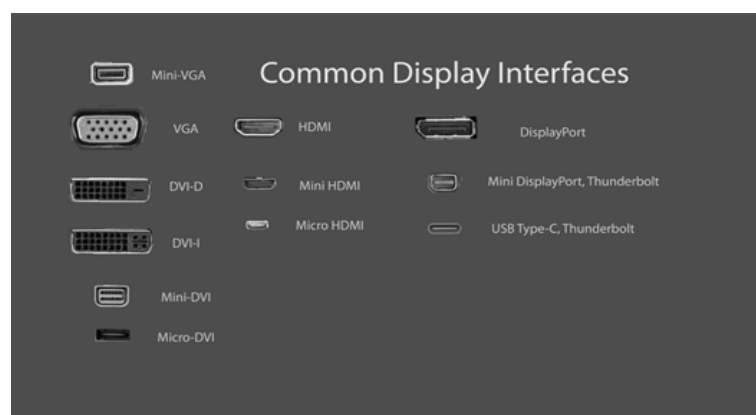

### STEP 1

Unpack laptop and dock from packaging and find a suitable space to place both the dock, laptop and any monitors you wish to connect to the laptop.

### STEP 2

Check what connection type your monitor supports:

Connect the monitors into the docking station (if applicable).

# LAPTOP DOCK & MONITOR(S)

## SETUP GUIDE

The WD19 dock has 2 DisplayPort connections and an HDMI connection.

There are DisplayPort to HDMI adapters available if your monitors only support VGA:

The WD15 dock has 1 Mini DisplayPort, 1 HDMI, 1 VGA port.

## SETUP GUIDE

### STEP 3

Once your monitors have been connected, connect your peripherals to the dock, for example your keyboard and mouse (if applicable).

#### Port information

1. High Definition Multimedia Interface (HDMI) out port
2. Mini-DisplayPort (mDP) out port
3. Video Graphics Array (VGA) out port
4. RJ-45 Gigabit Network in port (W/LEDS)
5. USB 2.0 (2-Connectors) ports
6. USB 3.0 port
7. 3.5 mm Speaker out jack
8. DC In power connector (Power to the Dock)
9. Dell Docking station connector (Dell Proprietary connection to USB Type 3 port on system)
10. 3.5 mm Headset Jack
11. USB 3.0 port (with Powersave Technology)
12. USB 3.0 port
13. Power LED
14. Dock Button (Power on system, wake from sleep)
15. Kensington lock slot

You can also connect your network cable (internet) during this step as well (if applicable).

# LAPTOP DOCK & MONITOR(S)

## SETUP GUIDE

### STEP 4

Connect the dock power cable to the actual dock itself.

This should be the large square brick that came with the dock (not the one that came with the laptop).

You do not have to plug the laptop power cable in if you will be primarily using the dock.

### STEP 5

Plug the attached USB-C cable (the small cable that is attached to the dock itself) into the laptop.

The plug should be on the back-left corner of the laptop as pictured below.

# LAPTOP DOCK & MONITOR(S)

## SETUP GUIDE

If everything has been connected properly, the light on the USB-C cable should now be illuminated, and you should then be able to power on the laptop!
